

IMPROVEMENTS MADE AT "SAN"

New Dressing Rooms and Other Features Provided for Bathers

Under the management of Sanford "Tan" Harrop and Christopher Aadneson the Ogden canyon sanitarium is undergoing extensive changes, the improvements, including the erection of additional dressing rooms, a large porch extending the width of the entire building along the Canyon boulevard and the contemplated extension of the outside swimming pool along the east side to the north end of the main structure, together with the erection of a new dancing pavilion immediately east of the private baths division of the main building.

Sixty new dressing rooms adjoining the outer swimming pool have been completed and the carpenters have done the finishing touches to the front porch. Various other changes and improvements have been made throughout the entire resort. The refreshment parlors have been made more accommodating and stocked with soft drinks in addition to a line of confectionery and cigars. The open and private baths have been scrubbed and cleaned and new bathing suits provided for the pleasure seekers. The water supply has been greatly increased and the fresh water lagoon is in readiness for bathers.

There are few cities in the United States that have natural mineral water bathing facilities within their limits," says Mr. Harrop, "and now that we have taken hold of the resort for a period of years, we will continue making improvements until the sanitarium shall be just what the people of Ogden want as a bathing resort. It is one of Ogden's prettiest scenic assets and we consider it worth while to spend some money in making it an up-to-date pleasure resort."

GEM STATE CROP PROSPECTS GOOD

BOISE, Ida., June 24.—Crop conditions over the state are very favorable in the opinion of E. J. Iddings, dean of the college of agriculture of the University of Idaho, who arrived here Friday to confer with officers of the extension bureau. The dean is visiting all counties in which the state has experimental stations and farms. From here Mr. Iddings will go to Twin Falls, Aberdeen, Rupert, Felt, and return to Moscow by way of Sandpoint. Methods of crop production, insect plagues and farm management are being studied by the head of the agricultural college, on his inspection tour.

Interest in farm work has been revived, the dean said, and inquiries from all parts of the state lead him to believe there will be a big enrollment in the agricultural work at the university when the fall term opens.

Modern Woodmen, Notice

All members requested to attend the funeral of Mrs. Leland Williams, Sunday at 12 o'clock at Sixth ward meeting house, 23rd and Madison.

ADD TO FLOW OF CITY WELL

Compressed Air Pumps Increase Volume in Tests Saturday.

Ogden's latest method of increasing the water supply at the artesian wells in Ogden canyon through the use of compressed air gave indication of success yesterday when Mayor Frank Francis and members of the city commission saw the stream from four wells rise to a height of a few inches to fountains four feet high when the compressed air was applied.

The increased flow was said to have been particularly noticeable from the large well which flows in a concrete basin near the well house. Without the use of air the water simply bubbled over the end of the upright pipe into the basin. Compressed air was then forced into the well and within a few moments the flow had increased until a stream of water was forced four feet into the air.

The air compressor was purchased and installed a few days ago as the result of the belief expressed by many experts who contend that there is a large subterranean lake beneath the wells. The experts claim that a large fault of rock holds the large underground body from flowing to the west and this natural underground dam backs up millions of gallons of water. Under ordinary flow the water that reaches the surface through the wells is that forced up by additional water entering the lake, they contend. The use of compressed air will force the water to the surface in much larger streams and at the same time will not decrease water in the lake materially because seepage from higher streams will immediately replace that forced out, according to their theory.

The equipment which the city recently purchased was installed at an approximate cost of \$3000.

BIRTHS

Births reported to the Ogden city board of health during the week follow:

Jacob C. and Mabel Waddoups Jacobson, 3145 Porter, boy.
Israel P. and Florence Fenstermaker Comble, Dee hospital, girl.
Aron C. and Bertha Greer Stimpson, 2477 1/2 Washington, boy.
George Edward and Ada A. Reddick, 387 Adams, boy.
Wm. H. and Winnifred E. Lowder, 822 West 2nd, girl.
Wm. Ernest and Vera Holden Barrett, 527 Thirty-fifth, boy.
Peter A. and Johana Van Battenburg Vellema, 3546 Jefferson, girl.
Claude S. and Olive Black Grow, 2041 Jackson, girl.
Jesse E. and Arvilla Jones Chase, 209 Twenty-second, girl.
Bunchoy and Aki Sagawa Kikuchi, 2204 Quincy, boy.
William H. and Rika Chutte Eddy, 1750 Lincoln, boy.
John B. and Verna Wilson King, 128 Patterson, boy.
Arvil M. and Florence Stevens Lamoreaux, Dee hospital, boy.
Allen and Mary V. Slater McEntire, rear 2929 Hudson, boy.
William Earl and Irene Maud Fast Dow, Dee hospital, boy.
Nells P. and Irene Eggington Meisner, 2045 Quincy, boy.
Allen and Mary V. Drielen Holliday, Dee hospital, boy.
Albert V. and Grace Allen Sparks, 520 Chester, girl.
Thomas A. and Priscilla Covington Smain, Dee hospital, girl.
David and Cora Call Neville, West Ogden, girl.

PARK CITY ORE SHIPMENTS GAIN

PARK CITY, June 24.—Ore shipments from Park City mines were increased to 4885 tons during the last week, compared with 4523 tons the week preceding.

Mines and the tonnage shipped by each follow: Ontario, 2190 tons; Silver King, 1182 tons; Park-Utah, 974 tons; and Judge, Daly and Daly-West, 549 tons. Total, 4896 tons.

BUSINESS IN EAST BETTER

Perry B. Arnold Comes to Lecture to Salesmen During Week.

Business conditions throughout the extreme eastern section of the United States are good and improving steadily, skilled workmen are in demand with advertisements appearing in newspapers daily for such and the prosperity is gradually working westward, according to Perry B. Arnold, business analyst for the Knox School of Salesmanship and Administration, of Cleveland, Ohio.

Mr. Arnold arrived in Ogden yesterday afternoon and will hold a "Better Business Institute," each night beginning tomorrow night at 8 o'clock in the Central Junior high school auditorium. The institute has received the endorsement of the retail merchants committee of the Ogden chamber of commerce, it is understood, and a number of the employees of the various business houses of the city will attend the institute during the coming week.

NEAR NORMAL PRODUCTION.—Relative to conditions in the east Mr. Arnold said yesterday that the steel mills were rapidly reaching a normal production, that tire manufacturers were working at capacity and that manufacturers of bearings were working at full time and behind in their orders.

Such conditions, he said, were but a reflection of the fact that the fact that some merchants were still operating on a hand-to-mouth basis, buying in small lots, paying therefore excessive freight charges and passing these on to their customers. With the result that prices of such commodities were higher than they ought to be.

The advance in wool prices and in other agricultural commodities in the east was reflected, he said, by an increased buying power on the part of the farmers.

The return to normalcy in the west he declared was in a great measure dependent upon the mental attitude of the sales people themselves, many of whom were standing in the way of their own advancement.

He is accompanied on this trip by A. F. Noble, field manager of the school.

BUSINESS METHODS.—The "Better Business" week short course will cover the fundamentals of governing successful salesmanship, personal efficiency and better business methods.

The course is open to any individual desiring to take a page of the special training offered in salesmanship and personal efficiency.

In addition to the lectures, business houses entering individuals for the week's institute will receive advice and instruction as to store arrangements, advertising and window display.

Special consultation service may be secured through Jesse S. Richards, Secretary of the Ogden Chamber of Commerce.

Program of lecture subjects:

Monday—"Putting 'Biz' in Business."
Tuesday—"Personality—The Human Element."
Wednesday—"The Mental How of Salesmanship."
Thursday—"Characterology, Types of People."
Friday—"Selling Your City."

COMMUNITY OUTING PLANNED BY LOGAN

An outing has been arranged by the Logan chamber of commerce in Tony grove, near Logan, on June 30, in which the forest service will cooperate, according to an announcement received yesterday forenoon at the offices of district four of the forest service from Supervisor C. B. Arntsen of the Cache national forest.

The use of Tony grove has been tendered by the forest service officials and the grounds are to be placed in order for the campers. Bonfire wood as well as beds and cots for the women will be furnished by the forest service.

Supervisor Arntsen stated that the indications pointed to one of the most successful community affairs ever held in Logan. The students of the summer school of the Utah Agricultural college have been invited to join in the hike to the grove.

CHATAQUA TO SHOW IN OGDEN

Annual Program to Be Given in This City August 5 to 11.

The Chataqua season of 1922 is an important one in the history of the Ellison-White Lyceum and Chataqua association as it is the tenth anniversary of the establishing of their Chataqua business in the west. To build a program which would fittingly celebrate this happy event was evidently in the mind of the Ellison-White management when the program for the coming season was arranged. The dates for the Ogden Chataqua have been definitely set for August 5 to 11.

Heading the lecture list is Opie Read, a prominent lecturer whom the Ellison-White people have been trying for the past five years to obtain for a tour of their western Chataquas. Opie Read is like no one else in the world. Perhaps you have enjoyed his books, been stirred by his plays, or spent happy hours in the reading of his clever character sketches, but unless you have sat within the sound of his voice and heard from his own lips the quaint tales that originate in his brain, you do not fully appreciate the splendid genius of the man.

The sixth night of Chataqua will be one of the most important of the entire series. On that night comes the famous "The Big Game" by Leslie Fowers of Hooper. Booders, gamblers and dive keepers in Chicago's famous "north side" know and hate Dr. Elmer Lynn Williams. They hate him because he is one of the bitterest foes graft and corruption ever had. In his fight in clearing up vice and crime in Chicago's loop district, he was given the name of "Fighting" Dr. Williams. He was formerly pastor of one of the largest churches in Chicago and comes to Chataqua at the height of his oratorical power with a message that is vigorous and vital.

Other prominent names found in the list of lectures are: Norman Allan Inrie, who is described as a "perfect tornado of eloquence," using as his lecture subject, "Working Together for Billions"; a masterly exposition of the Anglo-Saxon problems of the age, Edna Eugenia Love, telling in an interesting way of some "Danger Signals on the Road to Health"; and J. C. Herberman, a brilliant, rapid-fire lecturer will discuss "Life's Balance Sheet."

Two entertainment features of the week will be the well-known play, "Happy Ricks," a dramatization of the "Capitulation" which ran in the Saturday Evening Post and were read by millions; and an evening of magic with the Paul Fleming company, master magicians.

Another feature of the program has not been slighted is evident with such musical organizations as the following on the list: Searns-Hellekson Trio, Patton Brothers Trio, Oceanic Quintet, Walteau Duo, Stone-Platt company and the Glivan Opera company.

COUNTY SCHOOL BOARD MEETS

Business For Fiscal Year Closed; Burch Creek May Get Building.

The Weber county board of education met Saturday forenoon in the First National bank building to finish up the business of the fiscal year which ended June 30.

Outstanding claims were disposed of with one or two exceptions. Bids for supplies such as pencils, ink, paper, tablets and other supplies received from the county were opened and the samples that had been submitted from various companies were viewed to determine the merits of the various goods submitted. The supply committee consisted of W. Stratford, Thomas Hodge and John D. Hooper spent considerable time in this work to make the most economical purchases at the same time getting good quality of school materials. Supt. B. A. Fowler said.

Upon recommendation of Supt. Fowler, a portable school will be built and maintained at Burch Creek to take care of the surplus of pupils in that district until regular building may be resumed. This is but temporary and can be constructed at a very nominal cost, he said. Such a building may later be utilized as a manual training shop or a shed for school wagons or buses.

The needed repairs and improvements for the ensuing year were listed and discussed by the board. It was the decision of the board in session that all urgent improvements would be made this year, but those that could be postponed until later should be delayed for consideration at some future date, possibly next year. "We are able to do in a much better manner and at a better price now than at any time during the past two or three years," Supt. Fowler said.

IMPROVEMENT IN DRAKE'S CONDITION

There has been a decided improvement in the condition of Newell Drake, son of Dan Drake of Sunset, according to a report received from the Deane Memorial hospital last night. Young Drake was reported as conscious during the greater portion of the day yesterday.

He was picked up near the Bamberger tracks early Sunday morning, last, with a fractured skull and has been unconscious at the hospital during the greater portion of the time since then at the hospital with but yesterday's momentary periods of consciousness. He is believed to have fallen from a Bamberger train.

POLICE AND FIRE DEPT. TESTS SET

Civil service examinations for applicants who seek appointment to the police and fire departments have been set for July 10, in the Central Junior high school, according to an announcement made by C. O. DeWolf, secretary of the civil service commission.

The examinations will be held at 10 o'clock in the morning. It was announced.

SPUDS PLANTED IN 2212 ACRES

Weber Farmers to Market Potatoes Under U. S. Grading System.

There will be grown 2212 acres of early potatoes in Weber county this season, according to a survey made this week by the Weber County Farm bureau. The growers contemplate marketing these potatoes this season, under the United States grading schedule. Orders are now being placed for graders, W. Preston Thomas, county agent said.

The acreage according to communities in the county, 327; Clinton, 243; Warren, 225; Riverdale, 170; Taylor, 92; South Weber, 75; Roy, 170; Hooper, 155 and Wilson, 144. Other communities not listed total 560 making a grand total of 2212 acres.

FARMERS ACQUIRE HIGH GRADE CATTLE

The Liberty Farm bureau has purchased one of the two pure-bred dairy sires, it was proposed to buy this season, from the Teese Guernsey herd at Tremonton. The animal obtained was the herd bull, the purchasers paying \$425.

Leslie Fowers of Hooper procured two high bred heifers and calves from Gilbert Thatcher. The importation of such high grade cattle will be a fine factor in improving the dairy stock of the county, W. Preston Thomas, county agent, said yesterday.

CELERY FARM TO BE VISITED MONDAY

The celery growers of the county are to visit the truck farm of James Hewitt at Marsart Monday evening, to study Mr. Hewitt's methods in growing and transplanting celery plants.

Mr. Hewitt has two celery beds 300 feet long and four feet wide in which he has produced more than 100,000 celery plants. He will plant this year eight acres of celery.

All those desiring to go are requested to meet on the east side of the federal building, Monday at 8 p. m. or at Mr. Hewitt's farm at 6:30.

MILLIONS NOW LIVING WILL NEVER DIE!

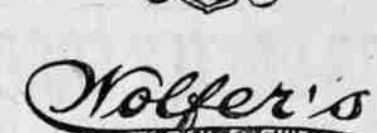

In practically every city of the United States, and in many cities of many foreign lands, the International Bible Students' association are today striving to give a world-wide witness to the truth. This service is done in a variety of ways. Some congregations, or classes, make a special effort to distribute Bible literature, selling, giving or loaning, as they find interest. In classes where the necessary talent exists, or where a competent speaker can be secured, this is done by public lectures. There are many small classes, however, who do not have speakers of ability, and such endeavor to appeal to Christian people through the medium of the daily press—similar to the methods adopted by the United States bureau of census in publishing a Sunday sermon, or its prominent features.

The International Bible Students, as their name implies, are Bible students. They do not claim to know it all; they are learners or students. They accept the Bible as their religious guide, as able to make them wise unto salvation, through faith, which is by inspiration of God, 2 Tim. 3:16. They accept the Bible as the inspired word of God, and believe the great Apostle Paul knew whereof he wrote when he told Timothy, "All scripture is given by inspiration of God—that the man of God may be perfect, thoroughly furnished unto all good works, 2 Tim. 3:16, 17; Holy men of God spoke as they were moved by the Holy Spirit. The scriptures plainly teach that they are God's messengers to mankind, and as a harmonized whole contain His complete scheme of salvation. His great plan is in the Bible, the scriptures, the Lord Himself said, for in them ye think ye have eternal life, and they are they which testify of Me, John 5:39.

In accord with this testimony of the Lord Himself, the Bible students lay stress on the prominence in God's word of the nature, work and kingdom of the great Redeemer and Blessor of mankind, Jesus Christ, the Son of God, the Lord Himself said, for in them ye think ye have eternal life, and they are they which testify of Me, John 5:39.

To the Bible students, the scriptures plainly teach that the special work of the Gospel Age is the selection of the Church—not churches—the calling out from all human denominations of that company of anointed believers—the body or bride of Christ—who are to share with Him in bringing blessings to all the recovered children of Adam—spoken of in Acts 3:19 to 23. That this company of believers is not numerous, popular, or influential, see Luke 12:32, Matt. 10:22; 1 Cor. 1:26. That Jehovah is doing the selecting, see John 6:44; and that the Bible—the truth—is the source of their knowledge and hope, John 17:17.

If you realize that conditions in the world are far from perfect; if you are familiar with sickness, sorrow and death; if you see so-called Christian nations still engaged in so-called Christian warfare; if you daily read of an increase of distress and crime even in our own land; if you know that we have today more temporal blessings than ever, and yet are more restless and dissatisfied; if you are convinced that the world never so needed the Gospel of Good Tidings and Peace as it needs it now; if you sometimes meditate as to why the dreams of men are so often preached from our pulpits instead of the word of God, Jer. 23:28; if you sometimes wonder if Christ and His Kingdom are to be forever "Thy Kingdom Come, Thy Will be Done on Earth, and the prayer is never to be answered—in short, if you are now interested in a story of God's great purpose to redeem and bless all the world of mankind, the Golden Age bureau, 636 Twenty-ninth street, phone 1443-W, would be glad to suggest reading matter of real value. In paper binding you can get "Millions Now Living Will Never Die," "Can the Living Talk with the Dead," "The Divine Plan of the Ages," and others in cloth binding, wonderful help for younger earnest searchers after truth. Seven volumes cloth bound, "Studies in the Scriptures," the nature and complete "Helps" in the study of good word, and other valuable publications on Bible topics.

DEATH RATE LOW, IDAHO REPORTS SAY

BOISE, Idaho, June 24.—The state of Idaho is now included in the United States death registration area, according to a telegram received Friday by Dr. F. W. Almond, state medical adviser, from the registration office in Washington. The inclusion of Idaho in the district is a result of an examination of the registration methods in operation in the state made by W. H. Lackay, an examiner for the United States bureau of census.

Idaho's death rate is about the same as the states of Montana, Oregon and Washington and these four states together have the lowest death rate of any in the United States. Lackay has been in Idaho examining the birth and death registration system of the state for the past two months.

The state missed out by 4 per cent from being included in the birth registration area. A total registration of 96 per cent of all births in the state is required and Mr. Lackay found that the state was registering but 92 per cent.

Idaho's birth rate, however, is one of the highest in the country, three states exceed. One of the states is Utah. For every 1000 deaths the state there are 290 births, the United States registration there are but 178 births for 1000 deaths. The birth rate per 1000 population is 27 and in the registration area the rate is 19 per 1000.

DIES PUTTING TIRE ON HIS AUTO

ST. ANTHONY, Idaho, June 24.—Holding a wrench in his hand, apparently in the act of putting some tires on his automobile, Charles F. living six miles north of here, found dead this morning by a neighbor, who had come over by appointment made the previous night in repairing the car. Heart failure was given as the cause of his death.

The Royal Neighbors will give a card party Monday evening at 8 p. m. in I. O. O. F. hall. The public is invited.

OGDEN'S BATHING RESORT

Ogden Canyon SANITARIUM

Mountain breezes fan the air, clean and health-giving exercise in refreshing baths in mineral and fresh water bathing of temperatures to your liking.
